EDUCATION

Columbia University, Graduate School of Architecture, Planning, and Preservation <i>M.S. in Computational Design Practices, Human-Computer Interaction</i> Relevant Coursework: Mapping Systems, Mapping and Data, Spatial UX, Computational Drawing, Prototyping in Urban Tech	New York, NY <i>Graduated May 2026</i>
New York University, Tisch School of the Arts <i>B.F.A., Interactive Media Arts; Minor in Computer Science</i> Relevant Coursework: Creative Robotics and Tech, Physical Computing, Machine Learning for the Arts, Creative Computing	New York, NY <i>December 2024</i>

EXPERIENCE

Vendelux <i>Product Designer Prev. Customer-facing products, Now. Internal Platform Tools (B2B SaaS)</i>	New York, NY <i>Mar 2026 – Present</i>
- Owned end-to-end design for Segments, a real-time audience-building platform, from concept through company-wide launch, replacing hours-long manual list workflows with reusable dynamic filtering. Drove 7.4K weekly API interactions, 2,000 audience queries, and 38 customer-created segments in the first post-launch week. - Designed Event Organizer MVP using an AI-first workflow: Claude to spec, Figma to prototype, V0 to finalize. This improvement doubled condition requests per query, from 0.44 to 0.79, within weeks of launch. - Built the design system from the ground up across 4 product surfaces, treating it as a modular, structured system (an 80-icon framework across 20 filters, a 3-state status system, a 4-variant Toast library) that could scale as the product grew. Used the Figma MCP plugin API to script components and tokens directly, cutting creation time from 2 days to 1 hour, introduced Storybook.js to document and stress-test component states, and shared the system with a 15-person cross-functional team.	
Columbia Robotics and Rehabilitation Lab <i>Web Designer & Graduate Researcher</i>	New York, NY <i>May 2025 – Mar 2026</i>
- Designed the interaction model and vest garment for C.A.S.T., a cable-driven postural support wearable for SCI patients: defined 3 gesture-based control modes (Neutral Lock, Free Mode, Stabilize Mode) and diagnosed and resolved 3 fit and tension failures in an early prototype through a non-stretch nylon redesign with shoulder anchors and symmetrical cable clips. - Designed and shipped the lab's public-facing site end-to-end with custom HTML/CSS, indexing on simplicity and clarity to serve 4 distinct audiences (clinicians, funding agencies, patients, academic collaborators) from a single content system.	
Stealth Startup <i>User Experience Designer Early-stage AI product</i>	New York, NY <i>Nov 2025 – Jan 2026</i>
- Worked as a full-stack designer on a 4-person team, using Claude Code and Cursor to prototype flows and Figma to finalize 200+ shipped screens, from concept to launch, in an ambiguous, fast-moving environment. - Partnered with the CTO and front-end engineers to take the MVP from concept to shipped in 2 weeks, running 10+ rounds of prototyping and iteration while translating technical constraints into design decisions.	

PROJECTS

PASSIT ON <i>Capstone, Advised by Michael Krisch</i>	violethyun.com/work/passiton
Designed and built an NFC-based, peer-to-peer garment tracking platform addressing textile waste flowing from the Global North into Ghana's Kantamanto Market, using UN Comtrade trade data and Kantamanto field research to visualize the scale of fast fashion waste, and shipping the prototype with Figma MCP, Claude Code, and Cursor on Vercel.	
Greener Walking Routes <i>Computational Modeling, Advised by Meli Harvey, Luc Wilson</i>	violethyun.com/work/greener-routes
Modeled a walking-navigation prototype in Rhino and Grasshopper, with Claude assisting the design process, to recommend routes with higher green exposure while limiting detours to under 15% of the shortest-route distance, reframing navigation around enjoyment rather than pure speed.	

LEADERSHIP

Design and Engineering Club <i>Founder & President</i>	NYU <i>May 2023 – Dec 2024</i>
Led design and engineering initiatives for a cross-disciplinary student community founded from zero, setting strategy, mission, and programming for 50+ members.	
Women in Computing <i>Event Coordinator</i>	NYU <i>May 2023 – Dec 2024</i>
Organized on-campus recruiting events with Meta, Google, and Goldman Sachs; supported 30+ women through portfolio reviews and networking, contributing to their successful job placement.	

SKILLS & INTERESTS

Agentic AI: Claude Design, Claude Code, Claude MCP, Cursor, Codex, Manus, Figma Make, V0, Google Stitch

Design & Development: Figma, Figma Plugin API, Adobe CS (Ae, Pr, Ai), Framer, Squarespace, HTML/CSS, Python, Vercel

Productivity & References: Linear, Granola, ClickUp, Miro, Mobbin, Page Flows, Cosmos, Awwwards, Dribbble

Research: User Interviews, Usability Testing, A/B Testing, Affinity Mapping, User Flows, Qualitative & Quantitative Synthesis
